ABOUT US

Enabling Progress: Kreate Technologies Pioneering Smart IT Revolution

At Kreate Technologies, we evolve with the future, we create it. As a premier IT services and business solutions provider, our mission is to innovate and advance AI and technology solutions to enable businesses to overcome their evolving challenges.

With a decade of comprehensive experience and a series of prestigious certifications—including CMMI Level-3 and ISO certifications (9001,20000,45001,14001, and27001)—we've consistently set the benchmark in the industry. Our role as a leading system integrator is underscored by our unwavering commitment to exceeding client expectations across varied sectors, including Renewable Energy, E-Governance, Oil & Gas, and Defense. Our ongoing success is a testament to the trust and loyalty we've built with our clients—ranging from innovative startups, Fortune 500 stalwarts, and government organisations. Together, we are driving impactful outcomes that are transformative and also contribute to reducing carbon footprints and fostering sustainability.

At Kreate Technologies, we believe in a future-ready approach grounded in ingenuity and inventiveness. Partner with us in the set endeavour as we leverage technology's potential to create a brilliant future.

SERVICES

- Artificial Intelligence
- E-Governance Solution
- Mobile Application Solutions
- GIS based Application
- Data Analytics Solutions
- CMS Based Website/ Web Portal Solutions
- Robotic Process Automation
- EV Mobility Solutions
- System Integration
- ERP Based Solutions

OUR PRODUCTS

Renewable Energy Forecasting Solution

Load Forecasting Solution

Real-Time Performance Monitoring Solution (Solar Plant)

GenAI Chatbot

Automated Invoice Verification Solution

GenAI Document Analyzer

GIS Based Real Time Monitoring Solution

Online Examination Solution

Renewable Energy Forecasting Solution

REDFx is an AI-powered forecasting tool that delivers precise solar, wind, and weather data to optimise energy strategies, reduce costs, and enhance grid reliability. It offers real-time alerts, custom scheduling, and supports short-term, medium-term, and long-term forecasting by considering multiple parameters such as weather, humidity, temperature, and wind speed. Our tool also features an integrated AI chat messenger for real-time updates, ensuring seamless operation. With unique capabilities like customised AI models, satellite image integration for enhanced weather accuracy, real-time data tracking, and detailed reports for comprehensive analysis, REDFx stands out as a powerful solution. Backed by over 31 GW of forecasting experience across international and Indian projects, Kreate Technologies is a trusted leader in the field.

Product Features :-

- Real-Time Data Integration
- Weather Forecasting Integration
- Real time Forecasting
- Real-Time Power Management
- AI Chat Messenger
- Auto Forecast Schedules
- Integration with Load Dispatch Centers
- AI Dashboard

Load Forecasting Solution

Our Load Forecasting Solution delivers precise electricity demand predictions across short, medium, and long-term timeframes by analysing weather patterns, historical data, and economic factors, enabling efficient energy management and planning. Backed with an adequate load forecasting capacity, we have managed to service across 153.5 GW. Our AI tool accounts for long-term scenarios, including economic growth, industrial revolutions, policy changes and other scenarios. Additionally, the tool performs gap analysis, helping to identify and understand deficit, surplus for sell and purchase from power exchange for better decision-making and strategic planning.

Product Features :-

- Generation Profiling
- Load Profiling
- Weather Forecasting Integration
- Monitoring Economic Growth Parameters
- Incorporation of Macroeconomic Parameters
- Real - Time Load Forecasting
- Integration with Load Dispatch Centers
- AI Dashboard

Real-Time Performance Monitoring Solution (Solar Plant)

Introducing Real-Time Performance Monitoring Solution for Solar Plants designed to empower you with comprehensive monitoring and performance tracking of your solar investment. With this innovative solution, you can ensure optimal returns on your solar energy system. Our platform features seamless integration backed with inverter, a user-friendly web portal, regular monthly inspections, and a centralised management system. Experience peace of mind knowing that your solar investment is operating at its peak performance, delivering maximum benefits for years to come.

Product Features :-

- 24/7 Real-Time Monitoring
- Performance Analytics
- Instant Alerts & Notifications
- Energy Usage Insights
- Mobile Application for Service Representatives
- Real-Time Data Capture
- GPS-Enabled Location Tracking

Automated Invoice Verification Solution

Managing invoices can be complex, particularly with fluctuating rates, and numerous suppliers. Our Automated Invoice Verification Solution simplifies this process by automating and enhancing the verification. With a focus on accuracy, transparency, and compliance, our solution ensures that every step is meticulously handled, allowing you to navigate the complexities with confidence and ease.

Product Features :-

- Real-Time Data Integration
- Contract Compliance Monitoring
- Historical Data and Trends
- Integration with ERP
- Secure, Cloud-Based Access
- Automated Invoice Matching
- Dispute Resolution Support

GenAI Document Analyzer

GenAI Document Analyzer is a ground-breaking innovative tool, well-equipped to revolutionise how you analyse, index and extract key information, including bulk data processing and region wise deployment. Be it complex contracts, project bids, or detailed reports, our AI-powered solution is adept to deliver key insights.

Product Features :-

- Multilingual Document Comprehension
- Exceptional Scalability
- Cohesive Image and Table Extraction
- Competent Parallel Processing
- Intelligent Information Retrieval
- Intuitive File Management

PRODUCTS

GenAI Chatbot

Next-gen conversational AI chatbot, your instant solution hub for company details, product info, and office locations. Backed with the support for multiple languages, it ensures seamless communication for all users.

Product Features :-

- Effortless Website Integration
- Dependable Multilingual Support
- Offensive Language Management
- Fluent Database Connectivity
- Uninterrupted Learning and Development
- Bespoke Knowledge Hub
- Economical Solution
- Multi-functional Information Access
- 24x7 AI-Powered Assistant
- Voice Translation
- AI-Customisable Human-Like Responses

GIS Based Real Time Monitoring Solution

Our GIS-based real-time monitoring capacitates administrators to assign and track real-time monitoring through role-based users, while field walkers capture and report incidents via a mobile app. With live data, route management, and comprehensive MIS reporting, the platform ensures seamless oversight and swift action.

Product Features :-

- User Authentication Module
- Role based App Interface Customization
- Role and shift based User Management
- Route Management
- Route and Task assignments for patrolling
- Real-Time Monitoring of Natural Resources
- Real-Time Monitoring Dashboard
- MIS Reports
- Mobile Incident Reporting
- Offline Field Data and Incident Capture
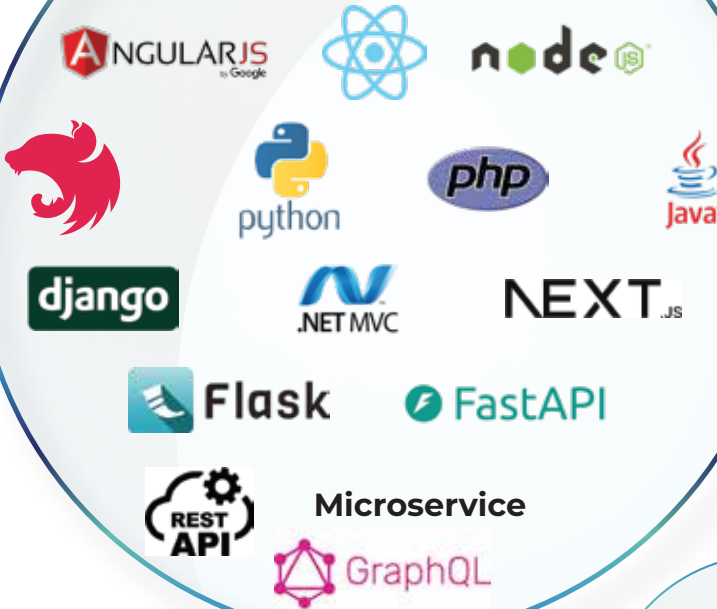

Online Examination Solution

Full-suite AI powered online examination solution, equipped with an interactive web portal, capable of managing the complete online examination process from generating question bank to conducting examination followed up with result publishing.

Product Features :-

- Exam centre management
- Candidate Management
- Examination module
- Exam Scheduler
- Question Bank
- Biometric Attendance
- Online Evaluation
- Web Monitoring
- Data Forensics
- Proctoring
- Smart Voice Detection
- Result Generation
